Advanced Working with Spreadsheet (Formula and Functions) - Stage IV -

Duration: 3 Hours

Course Objective:
Microsoft Excel offers a large variety of useful functions that can significantly improve work effectiveness, productivity and results. However, many users cannot take full advantage of Excel ‘functions because they do not know what is available or they are not sure how to use them. This 3-hour course is designed to remedy this situation by introducing to you about 7 categories of Excel functions with practical examples and hands-on practice.
